

Assignment : 2

Date :18/07/2026

Session : 1

❖ Write a short paragraph in your own words defining what a 'program' is and give one real-life example from any app you use daily (like Instagram, Zomato, or Paytm).

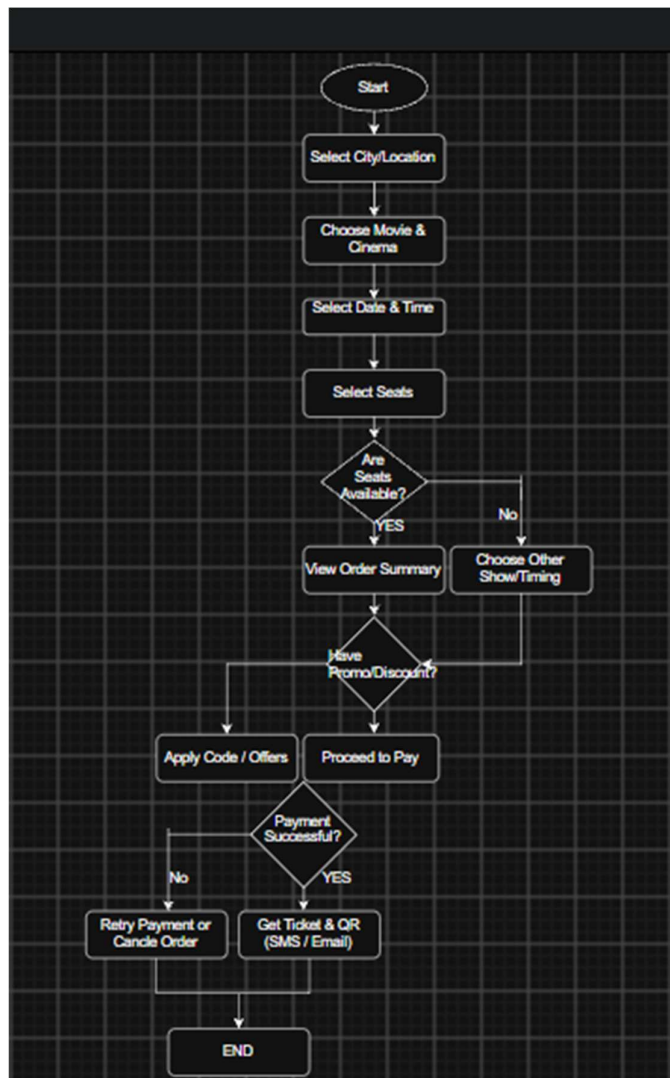

➤ A **program** is a set of instructions written in a programming language that tells a computer what to do. It helps the computer perform specific tasks automatically.

Example: The **Instagram** app is a program. It allows users to upload photos, watch reels, send messages, and interact with other users.

❖ List three popular programming languages you have heard of, and for each, mention whether it is usually compiled, interpreted, or can be both.
Hint: Think of languages like Java, Python, and JavaScript.

Programming Language	Compiled / Interpreted
Java	Both (Compiled to Bytecode and Interpreted by JVM)
Python	Interpreted
JavaScript	Interpreted (Modern engines use JIT compilation internally)

- ❖ Draw a flowchart (on paper or using any online tool) for the process of booking a movie ticket on BookMyShow, starting from opening the app to receiving the booking confirmation.

❖ Write down the steps (as an algorithm, using simple numbered instructions) for ordering food on Swiggy — from opening the app to completing payment.

➤ Algorithm – Ordering Food on Swiggy :-

- ✓ Start.
- ✓ Open the Swiggy app.
- ✓ Log in to your account.
- ✓ Enter or confirm your delivery address.
- ✓ Search for a restaurant.
- ✓ Select the restaurant.
- ✓ Choose the food items.
- ✓ Add the items to the cart.
- ✓ Review the cart.
- ✓ Click Proceed to Checkout.
- ✓ Select the payment method.
- ✓ Make the payment.
- ✓ Order is confirmed.
- ✓ Wait for the food to be delivered.
- ✓ End
