

Write a SELECT query to find all songs in the Playlist table where the genre is 'Pop' and play_count is greater than 100. Sort the results by play_count in descending order.

The screenshot shows the MySQL Workbench interface. The left sidebar displays the 'SCHEMAS' tree with 'instaclone' selected. The central query editor contains the following SQL code:

```
1 • use instaclone;
2 • SELECT *
3 FROM Playlist
4 WHERE genre = 'Pop'
5 AND play_count > 100
6 ORDER BY play_count DESC;
```

The 'Result Grid' at the bottom displays the query results in a table format:

	id	song_name	artist	genre	play_count
▶	2	Shape of You	Ed Sheeran	Pop	150
	7	Shape of You	Ed Sheeran	Pop	150
	12	Shape of You	Ed Sheeran	Pop	150
	17	Shape of You	Ed Sheeran	Pop	150
	1	Blinding Lights	The Weeknd	Pop	120
	6	Blinding Lights	The Weeknd	Pop	120
	11	Blinding Lights	The Weeknd	Pop	120

The bottom status bar indicates 'No object selected' and 'Playlist 1 x'.
