

❖ **Install MySQL Workbench on your computer, connect to the local MySQL server, and take a screenshot of the default databases shown in the Schemas panel.**

Steps :-

1. Download and install MySQL Workbench.
2. Open MySQL Workbench.
3. Click Local instance MySQL.
4. Enter your root password and connect.
5. Open Schemas from the left panel.
6. Check the default databases: mysql, sys, performance_schema, etc.
7. Take a screenshot of the Schemas panel.
